# 1.1 CONTACT CARD

## CONTACT SEARCH

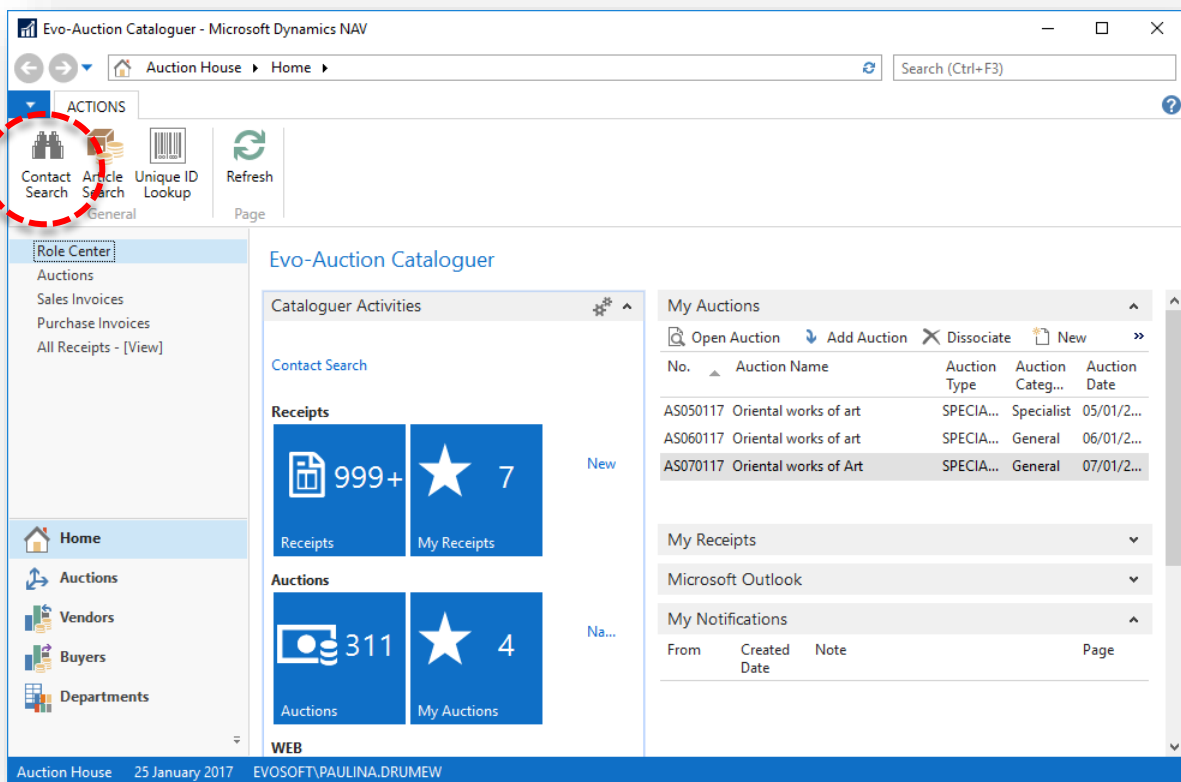

**Contact Search** is the master database storing details of all the buyers, the sellers or any other entity involved in buying/selling or marketing processes.

A vendor/buyer must be created as a contact, and then a vendor/buyer template is used to create a vendor/buyer from the contact. This sequence is maintained, because the contact card is key for marketing and other CRM functions.

Information on a contact card and related vendor/buyer card are synchronised. Any changes to mutual fields, such as name and address or phone number, made on one of these cards are replicated on the other. In this way, Evo-auction only maintains one set of communication data.

To access the **Contact Search**:

1. Navigate to your **Role Center**, and then select **Contact Search** from the Ribbon. Alternatively, in the Search box enter **Contact Search**, and then choose the related link.

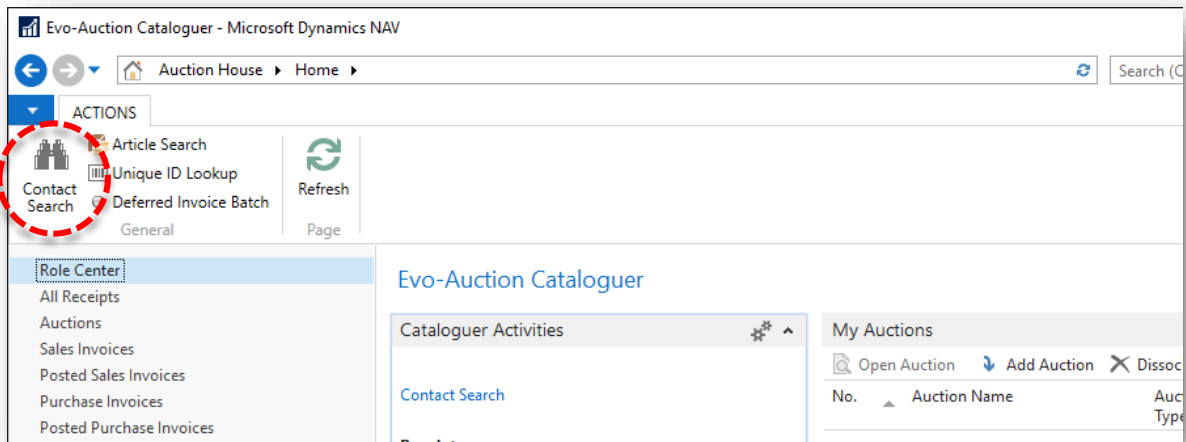

## REGISTER NEW CONTACT

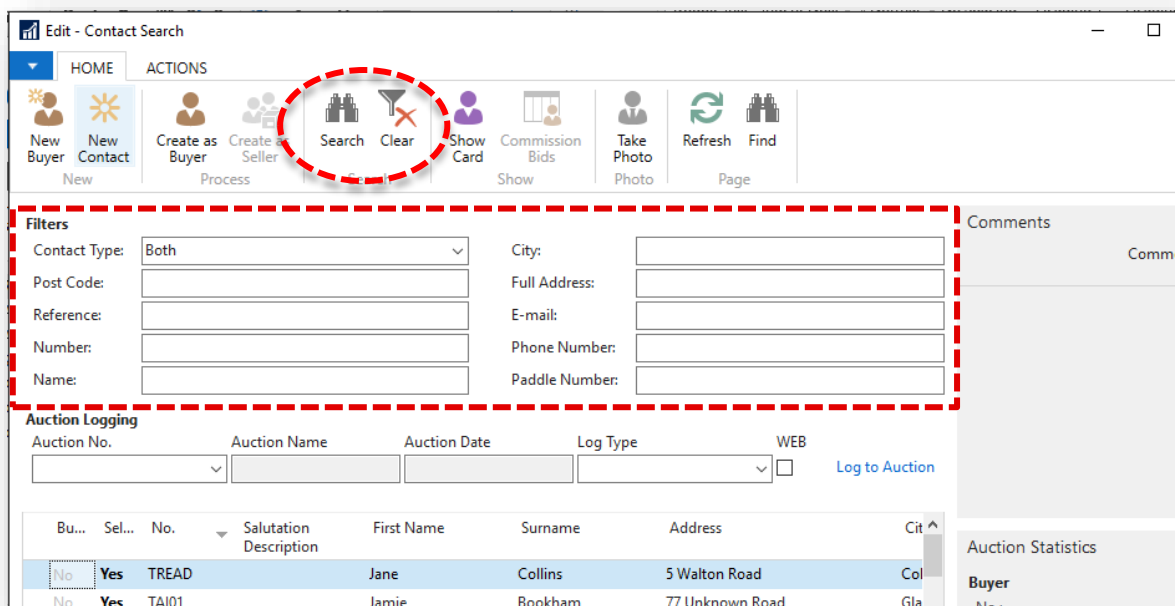

Before you register new contact, it is a good practice to check if person/company already exist on the system to avoid duplication.

To check if a contact already exist:

1. Navigate to the **Contact Search** page.

2. To search for a contact, go to the **Filters** pane. You can search by filling in any information such as telephone number, postcode, surname and so on.
3. Select **Search** from the Ribbon.  
To cancel search/filter and bring all the contacts list back, select **Clear** from the Ribbon.

**NOTE**

If a contact is registered as a buyer, you will see **Yes** in the **Buyer** column.

If a contact is registered as a vendor, you will see **Yes** in the **Seller** column.

If a contact is registered as a vendor and a buyer, you will see **Yes** in both columns.
